

The Research Program at Earthwatch (formerly the Center for Field Research) reviews and recommends proposals for support by Earthwatch Institute (EWI). EWI sponsors field studies worldwide by scholars working to investigate and/or conserve the Earth's physical, biological, and cultural heritage. Interested scholars should submit to Earthwatch a two-page preliminary proposal form describing planned research and field methods, including dates, budget, and plans for the use of EWI volunteers as field assistants. If funding for the proposed research is deemed appropriate, a more detailed full proposal will be invited for peer review. Earthwatch Institute is a not-for-profit organisation. The fiscal year 2002 program is distributed as follows: Life Sciences 74%, Physical Sciences 8%, and Social Sciences 18%. We are pleased to announce that the following projects have been approved for EWI support in fiscal year 2002.
