

Program Schedule

- 8am **Registration, coffee and breakfast snacks**
- 9am **Introduction to program, Icebreaker**
Participants will be introduced to Earthwatch Institute and begin working as a group to get the most out of the day's activities
- Our World: Science and Socio-economics of Climate Change**
Participants will participate in a learning session focused on the science and socio-economics of global climate change. The morning will include a mix of presentations and hands-on activities that can be replicated in the classroom.
- 12:30am **Lunch**
A catered lunch will be provided for participants.
- 1:30am **Our Backyard: Current Research at the Smithsonian Environmental Research Center**
The afternoon session will be lead by experienced climate scientists. Participant will receive a presentation on current research, and venture into the woods for a tour and demonstrations of research experiments in process. Long pants and comfortable walking shoes are required.
- 4pm **Our Classroom and Community: Translating climate change lessons and activities to your students**
After learning about climate change from a global and local view, participants will work in teams to plan lessons, activities, and action projects for students and community members.
- 6pm **Team Dinner and Close**
A delicious meal will be prepared.
- 7pm **Departure**
