

It's Their World.

Earthwatch
Teen Teams

Time is running out for teens to make a difference.

Time is running out for you to make a difference.

Through Earthwatch, teens ages 16 and 17 connect with leading scientists, learn new skills, and make use of the power they have to change the planet.

Teen Teams provide:

- Life-changing experiential education in field research
- Community based learning, service learning, summer break, and winter term experiences
- Organized and safe group activities for recreational time
- Ideal material for college application essays
- Earthwatch staff to supervise and enrich teens' learning experiences
- Exposure to global citizenship and world cultures
- A chance to take action on behalf of a threatened environment

One planet. So many ways for Teen Teams to help.
